Construction Notice: Regional Drinking Water Infrastructure

In November, Kitsap PUD will begin construction of Phase 8 of Kitsap’s Regional Drinking Water Infrastructure. Phase 8 will install approximately 8,000 feet of water main to connect KPUD’s Vinland Water System to KPUD’s North Peninsula Water System. This infrastructure helps provide sustainable water supply to central and north Kitsap County while also providing improved ability to manage Kitsap’s water resources for the benefit of people and fish.

Trail users will experience a slight inconvenience during the construction period which is expected to run from November 2019 to March 2020. Please avoid affected trails during construction. There will be no ongoing impact to trail users once construction is complete. Thank you for your patience as we build this important infrastructure for Kitsap County.

Legend

- Regional Reservoir
- Existing Water Main
- Phase 8 Main Extension
- Trails Affected By Construction
- Mountain Biking Trails
- Service Roads
- Kitsap County Roads
